Sep.2008- Sep.2012 Bachelors degree in Nursing

Cyprus University of Technology, Limassol, Cyprus

Thesis: “ Knowledge and Contribution of Midwives in Exploratory Method of Down Syndrome”

The search resulted in eight surveys observing the prescribed criteria. The knowledge and contribution of midwives in most articles shows that they don't feel confident about their knowledge, whether the screening should be done routinely, who should give advice to pregnant women and explain the main features of Down syndrome. Researchers even studied whether pregnant women were fulfilled by the information they got from professionals - midwives but also the influence of the fulfillment of midwives with the knowledge and services they provide to pregnant women. The results showed that all researchers used questionnaires as a tool for measuring and interviews by phone or by email.

Clinical Practice: Larnaca General Hospital: Department of Pathology, Surgery, Orthopedics, Obstetrics, Pediatric ward, Surgery, Accident and Emergency Department, Intensive Care Unit.

Cyprus Oncological Table: Booth B.

Community: Pancyprian Association of Cancer Patients and Friends (PASYKAF), School Service, Psychiatric Service.

2005-2008 Ayios Georgios Lyceum

- Apolytirion
- Major subjects studied: Modern Greek, History, Maths, Dactylography and Biology

Interests:

I enjoy traveling because it allows you to learn and be aware of different cultures and nationalities. I enjoy learning and observing about what is happening in the world today, thus I do read a lot and research on many topics to be able to reach my own conclusion.
